Air Transat Shareholder Vote

MISSISSAUGA, ON – The following statement is from Captain Michael McKay, Chairman of the Air Canada Pilots Association:

“We have noted the news from the Group Transat A.T. Inc shareholder meeting today that a majority has voted in favour of the Air Canada acquisition.

Shareholder approval is just the first hurdle in what we expect to be a longer and complex process of additional regulatory approvals that include the Competition Bureau and the Minister of Transport. As such, there is no change for our members as a result of today's news.

We are not yet privy to significant details, including business and operational plans.

Over the coming months, the Air Canada Pilots Association looks forward to working in a constructive manner with Air Canada management and our fellow professional pilots at Air Transat.”
